PROJECTS

- **E-commerce site - Amazon**
 - This is an e-commerce website. It's an MERN stack based project. It's working like an amazon website.
 - Currently i have been developing products filter, pagination, searching products in front-end.
 - I have been using password correction api, login api, error handlers api and authentication, order products api, product data update api.
 - I'm using in this project function component method.

- **Food order site - Zomato clone**

- I'm using in this project class component. It's like a food order site.
- I'm using in this project MERN stack.
- I have been using in this project filter page, details page, pagination, search, routing in my front-end.
- I'm using in my back-end product filter api, location api, meals type selecting api, restaurant selection api.

- **Product Filter**

Product filter in with javascript based

- **Types of clocks**

- Analog clock
- Digital clock
- Start stop watch
- Countdown timer for new-year
